MHIS

Mental Health Information System

> Sensitive, structured mental health records — assessments, therapy notes, medication management, and crisis care protocols.

MHIS provides structured clinical records for mental health facilities — psychiatric inpatient units, community mental health centres, addiction treatment programmes, and outpatient psychiatry clinics. It implements privacy-first data architecture, ensuring mental health records are accessible only to authorised mental health professionals.

OVERVIEW

Built for African healthcare, not adapted for it

MHIS includes validated assessment tools (PHQ-9, GAD-7, AUDIT, CAGE, PANSS, YMRS) embedded in the clinical workflow, alongside structured therapy session notes, medication management (including depot injection scheduling), and crisis care protocols.

Who is MHIS for?

- ✓ Psychiatric inpatient units
- ✓ Community mental health centres
- ✓ Addiction treatment and rehabilitation programmes
- ✓ Outpatient psychiatry and psychology clinics
- ✓ NGO mental health programmes

Problems MHIS solves

1. **Mental health records not appropriately privacy-protected**
   MHIS records are isolated from general OPES EMR access — only authorised MH professionals can view.
2. **Validated assessment tools not used consistently**
   PHQ-9, GAD-7, PANSS, and other validated tools embedded in every assessment workflow.
3. **Depot injection schedules missed**
   Automatic alerts for due depot injections and long-acting medication administrations.

MODULES

Everything in one connected system

Each module activates independently — start with Registration and Consultation, add Lab, Pharmacy, and Billing as you grow.

Psychiatric Assessment

Structured psychiatric assessment with MSE, risk assessment, and validated rating scales.

- Mental State Examination (MSE)
- PHQ-9 · GAD-7 · PANSS · YMRS
- Suicide & risk assessment tools
- ICD-10 psychiatric diagnosis coding

Therapy & Session Notes

Structured notes for individual therapy, group sessions, and family therapy.

- Session type templates
- Progress note SOAP format
- Goal tracking & outcomes
- Group session attendance

Psychiatric Medication

Medication management with depot scheduling, side effect monitoring, and pharmacy integration.

- Depot injection schedule
- Side effect rating scales (UKU)
- Controlled substance registry
- Integration with PHARMIS

PATIENT WORKFLOW

How MHIS moves a patient through your facility

From the moment a patient arrives to discharge, every step is captured — and every department sees the full picture in real time.

1 **Referral**
From GP or self-referral

2 **Assessment**
Psychiatric & risk assessment

3 **Diagnosis**
ICD-10 coded

4 **Treatment**
Medication & therapy plan

5 **Review**
Outcome scales tracked over time

KEY BENEFITS

Why facilities choose MHIS

Privacy-protected records

Mental health records isolated from general clinical access — only authorised MH professionals.

Validated assessment tools

PHQ-9, GAD-7, PANSS and more embedded — no paper forms, consistent application.

Depot injection alerts

Never miss a depot injection — automatic alerts for every due administration.

Pharmacy integration

Psychiatric medications prescribed directly to PHARMIS including controlled substances.

OPES ECOSYSTEM

MHIS connects everything

MHIS is the clinical core — every other OPES system feeds into it or reads from it.

MHIS — Clinical Core

OPESCare | OPES EMR | PHARMIS | REHABIS

TECHNICAL SPECIFICATIONS

Built to enterprise standards

Privacy

Record isolation	**Separate access control from OPES EMR**
Encryption	**AES-256 at rest · TLS 1.3**
Access	**Mental health professionals only**
Languages	**English · French**
