RCMIS

Revenue Cycle Management Information System

> Automate billing, insurance claims, CNPS submissions, and revenue reporting across your entire facility.

RCMIS is the financial backbone of OPES-connected facilities. It receives billable acts automatically from OPES EMR, OPES Lab, PHARMIS, and RADIS — building a complete, accurate patient invoice without any manual data entry by the billing team. Every consultation, lab test, dispensed medicine, and imaging study is captured.

AT A GLANCE

Zero
billing leakage

Auto
invoice from clinical acts

CNPS
claim generation

Real-time
revenue dashboards

EN / FR
Fully bilingual interface

HL7 FHIR
Interoperability standard

22
OPES systems it connects to

OVERVIEW

Built for African healthcare, not adapted for it

Insurance claims, CNPS submissions, and mutual fund reimbursement requests are generated automatically from the same billing data and tracked through to payment. Revenue dashboards give finance directors real-time visibility on collections, outstanding claims, and payer mix.

Who is RCMIS for?

- ✓ Hospital finance and billing departments
- ✓ Private clinic owners and administrators
- ✓ Multi-facility groups managing consolidated revenue reporting
- ✓ Insurance claims processing teams
- ✓ CNPS-affiliated healthcare providers

Problems RCMIS solves

1. **Billable acts missed due to paper-based billing**
   Every clinical act from every OPES system posts automatically — zero billing leakage.
2. **Insurance claim rejections from incomplete data**
   Claims are built from validated clinical data with all required fields pre-populated.
3. **No visibility on outstanding payments**
   Real-time aging reports show every unpaid invoice by payer, age, and amount.
4. **Manual CNPS submission errors**
   CNPS-format claims generated automatically from the billing data with correct tariff codes.

MODULES

Everything in one connected system

Each module activates independently — start with Registration and Consultation, add Lab, Pharmacy, and Billing as you grow.

Automated Invoicing

Patient invoices built automatically from all clinical acts across every connected OPES system.

- Auto-receive from EMR, Lab, Pharmacy, Radiology
- Tariff schedule management
- Multi-currency support
- Printed & electronic invoice

Insurance & CNPS Claims

Insurance claims and CNPS submissions generated automatically and tracked to payment.

- CNPS tariff code mapping
- Electronic claim submission
- Rejection & re-submission workflow
- Payer payment tracking

Revenue Analytics

Real-time dashboards on collections, outstanding, payer mix, and revenue by department.

- Daily collections report
- Aging accounts receivable
- Payer mix analysis
- Department revenue breakdown

PATIENT WORKFLOW

How RCMIS moves a patient through your facility

From the moment a patient arrives to discharge, every step is captured — and every department sees the full picture in real time.

1
Clinical Act
Service performed in any OPES system

2
Auto-Posted
Act logged to patient invoice instantly

3
Invoice Built
Complete bill ready at discharge

4
Claim Generated
Insurance / CNPS claim auto-built

5
Payment Tracked
Collections tracked to zero balance

KEY BENEFITS

Why facilities choose RCMIS

Zero billing leakage

Every clinical act from every OPES system is captured automatically — nothing falls through the cracks.

Faster claims processing

Insurance claims are built and submitted electronically — no manual form-filling.

Real-time financial visibility

Finance directors see collections, outstanding, and payer mix in real time — not at month end.

CNPS compliance

CNPS tariff schedules built in — correct codes applied automatically on every claim.

OPES ECOSYSTEM

RCMIS connects everything

RCMIS is the clinical core — every other OPES system feeds into it or reads from it.

RCMIS — Clinical Core

OPES EMR **OPES Hospital HIS** **OPES Lab** **PHARMIS** **RADIS** **UHC IS**

TECHNICAL SPECIFICATIONS

Built to enterprise standards

Billing

Tariff systems	**CNPS · Mutual funds · Private insurance · Cash**
Multi-payer	**Split billing per visit**
Currency	**XAF (FCFA) primary · Multi-currency**
VAT / tax	**Configurable rate schedules**

Integration

Receive from	**OPES EMR · Lab · Pharmacy · Radiology**
Claims format	**CNPS electronic format**
Export	**CSV · Excel · PDF reports**
Accounting	**Sage / QuickBooks export**

Security

Encryption	**AES-256 at rest · TLS 1.3**
Authentication	**Role-based (Cashier / Billing / Finance Director)**
Audit logging	**Every billing action logged & timestamped**
Void control	**Dual authorisation for invoice voids**
