REHABIS

Physical Medicine & Rehabilitation Information System

> Structured rehabilitation records — physiotherapy, occupational therapy, speech therapy, and multidisciplinary team coordination.

REHABIS provides a complete rehabilitation information system for physiotherapy, occupational therapy, and multidisciplinary rehabilitation teams. It includes structured functional assessment tools (Barthel Index, FIM, Berg Balance Scale), goal-setting with outcome tracking, session records for individual and group therapy, and integration with ORTHOIS for prosthetics and orthotics coordination.

AT A GLANCE

OVERVIEW

Built for African healthcare, not adapted for it

REHABIS supports rehabilitation pathways for stroke, traumatic brain injury, orthopaedic surgery, spinal cord injury, and chronic musculoskeletal conditions — tracking patient progress from acute rehabilitation through community reintegration.

Who is REHABIS for?

- ✓ Hospital physiotherapy departments
- ✓ Rehabilitation centres and long-term care facilities
- ✓ Stroke and neurological rehabilitation units
- ✓ Orthopaedic post-surgical rehabilitation
- ✓ Community rehabilitation programmes

Problems REHABIS solves

1. **Rehabilitation goals not set or tracked**
   SMART goal-setting with regular review — progress tracked using validated outcome measures.

2. **MDT communication fragmented**
   Shared MDT notes and goal board visible to all team members — physio, OT, speech, nursing, and doctor.

MODULES

Everything in one connected system

Each module activates independently — start with Registration and Consultation, add Lab, Pharmacy, and Billing as you grow.

Functional Assessment

Validated functional outcome measures at admission, discharge, and follow-up.

- Barthel Index · FIM
- Berg Balance Scale
- Oxford Muscle Strength grading
- Pain scale (NRS/VAS)

Goal Setting & Therapy

SMART rehabilitation goals with session records and outcome tracking.

- SMART goal templates
- Session record by discipline
- Group therapy attendance
- Home exercise programme printing

MDT Coordination

Shared team goal board and communication notes for multidisciplinary rehabilitation.

- Shared MDT goal board
- Cross-discipline notes
- MDT meeting records
- Discharge summary generation

PATIENT WORKFLOW

How REHABIS moves a patient through your facility

From the moment a patient arrives to discharge, every step is captured — and every department sees the full picture in real time.

1 **Referral**
From OPES EMR or hospital

2 **Assessment**
Barthel / FIM scored

3 **Goals Set**
MDT SMART goal plan

4 **Therapy**
Sessions recorded

5 **Review**
Outcomes measured & goals updated

KEY BENEFITS

Why facilities choose REHABIS

Validated outcome measures

Barthel, FIM, and Berg Balance tracked — objective evidence of rehabilitation progress.

True MDT working

Shared goal board and notes — every team member sees the same patient goals and progress.

O&P integration

ORTHOIS device fabrication coordinated directly from the REHABIS rehabilitation plan.

Community discharge planning

Home exercise programmes and community referrals built into the discharge workflow.

OPES ECOSYSTEM

REHABIS connects everything

REHABIS is the clinical core — every other OPES system feeds into it or reads from it.

REHABIS — Clinical Core

OPESCare | OPES EMR | ORTHOIS | MHIS | SLTIS

TECHNICAL SPECIFICATIONS

Built to enterprise standards

Deployment

Options	**On-premise · Cloud**
Mobile	**Tablet-optimised for therapy sessions**
Languages	**English · French**
